Requisition. LILLOORT, July 16, 1871.

BASIL HUMPHREYS, Esq. Dear Sir: -The undersigned having full confidence in your fitness and integrity, request that you will consent to be nominated as our representative in the Legislative As-

We have the honor to be, Dear Sir, R. Hoes, A. T. Jameson, W. Chadwick, Rost. P. Ritchis, M. BRADT, O. R. H. O. BOWS, W. H. KAT, THOS. G. MARSHALL James Chozter, George Dunne, A. W. Smith. Javo and se others.

Gentlemen: Nothing can be more gratifying than the henor of having succeeded in gaining the approbation and good will of the people of one the most important constituencies in the country. I have great pleasure in accepting the nomination alluded to in your requisition. The next Legislative Assembly will probably be the most important that has ever met in this colony, and it behoves all good men to be vigilant, and to exert themselves to insure the successful working of Parliamentary Government.

It may be found well in practice to remember that the misrepresentations of those designing men, who so loadly asserted that you were not qualified to exercise pulitical functions with advantage to yourselves or to

functions with advantage to yourselves or to the country, have been signally refuted, and that twelve years of misgovernment proves most conclusively, that they were not compe-tent to hold, or exercise, the office of governors with advantage or safety to the community. Experience shows toat it were vain to expect political improvement from men in whose official career is not to be found material progress, when not identified with their personal profit or advancement. I confess that when peculating on the causes which led to the disestrous retrogression of the past, I am puzzled to account for the long con inuance of a political system, to which is truccable so such unmixed evil-a system containing within i seif such active elements of ruin, which when considered in the abstract, might bave been expected to put an end to its existence much sooner. Nor judeed is this all. It will be the duty of future legislators, in their post mortem examination of the late government to fearle sly probe the complicated disorders which paved a way for its final

community has suffered political ills so part-ently as the people of British Columbia. The amount of malidministration, and the extraordinary nature of official aggrand zement i perfectly aston ding, A norece 1 rab e collection of despotic follies can baruly be imagined. We have seen public servants voting the own salaries, fixing their own pensions defying public opinion, and pursuing with sudied male olence, the popular representa-tives. We have seen mere advenuerer. employed as envoys entrusted with importan a te s crets-adver turers who are universal ; execrated, whom the people have never trusted and have to g suspected-creatures who are to British Columbians what the hateful Conditions were to the Ancient Romans Nay to crown this bumiliating drama, a perverse and apparently senseless superior authority receive them with fulsome flattery, and applatse and preferment is showered upon

It will hardly be disputed by men of candonr and experience that there are certain requisites indispensably necessary to the security and efficiency of all just governments the most important of which I believe to be, freedom and security against wrong. Now I think you will readily admit that most civilized governmen a have succeeded presty well in securing the people against wrong from each other; but to secure them by laws against wrong from the government itself, is a problem of a far more difficult sort, which few nations since the commencement of governments have attempted to solve. But it is a problem upon the solution of which depends the freedom and security of every existing nation against oppression and peculation, and which from its importance commends itse f to the anxious and impartial consideration of all men who are desirous of rendering permanent ervice to mankind

ducation, of civil and religious liberty.

The singularly baneful and distinctive el events, is pregnant with nstruction and warning, and affords to every effecting mind numerous and important les sons. The time appears appropriate for turning such lessons to account by improvements at once expedient, practical, and decisive; but they realize only half the danger which these events indicate, who see in them only official usurpation on the one hand, and determined opposition on the other. The lesson which these events teach us is. that gross legislation and extrene gitation are inseperably connected that each is the blood relation of the other. Nay more, the danger indicated is to be apprehended by placing great powers in the hands of our governors without being secured by immediate not remote, certain not dubiououst tutional laws that those power shall not

That it is not the business of those who govern to compel public opinion to follow hem. but that it is their duty to follow public opinion, is a canon of my political creed. Unfortunately the practice of those who have governed this colony, has been, both by precept and example to think differently, but the day is not far distant when the predictions of the advocates of justice and of reason shall be verified,—when the unjust and barbarous laws which disfranchised so many intelligent and worthy citizens shall exist only as evidence of the bijorry, and sordid ignor nee of those from whom they emanated.—when the promising future proclaims the results o Confederation, the promotion of arts and science, the diffusion of useful truth, of

I earnestly trust that with the advantages afforded by Confederation and Responsible Government our popular representations may so far ignore local issues as to faithfully and permanently reform the bad legisla-tion of the past, and by a comprehensive and iberal policy, inaugurate a new era in our colitical history and moure the prosperity and appiness of all.

the best of my ablity, to carry out your wishes and opinions.

Lam not in favor of pensioning the officials, and will advocate the repeal of the Permanent Civil List Act. I will also vote for the repeal of the Qualification and Registration of Voters' Acts, as they are, in my opinion, unjust and unmited to the people of this colony. I will resist any attempt of monopoly. I sm in favor of an enlarged system of education.

In conclusion, I assure you that it will be my duty to advocate economy in every department of the Government', and to suppor that policy best calculated to benefit the colony, that I will act in unison with the liberal and progressive party, whose principle it is to extend the power of the people and to remove those injurious laws, which are so degrading to the community.

Wednesday, August 2, 1871. Dual Officials. Under the terms of Union there is as exceptional period within which the Legislative Assembly will have a direct voice in determining what kind of a tarof in its judgment, best suited to British Columbia. After the exceptional period, the imposition of an uniform or special tariff will be exclusively the province of the Federal government. There is also another exceptional period in our relation with the Dominion, and that is with respect to dual officials—those serving the Provincial and Federal governments at one and the same time. The period of a ZEALOUS dual officials grows naturally out of a temporary state of relations with the Federal government, and how long it will last is not yet decided, and possibly will not be till the local legislature shall have met in the fall. According to the "British North America Act, 1867," it is presumed that those officials who were discharging duties that came under the exclusive prerogatives of the Federal government would, by the mere act of Union, become Federal officials. This to a certain extent is the fact ; but almost without an exception the federal officials are provincial officers, and vice versa.

The Collector of Customs for the Port of Victoria is still an adminstrative officer of the province, in the capacity of an Executive Councillor. The Collector of the port of Nanaimo is not merely a Custom House officer but, he is a county Court Judge, and his salary since Union is due from the Dominion Treasury. He is at the same time a local receiver of internal revenue for the Province, a commissioner of Crown Lands, a gold commissioner, and a stipendiary magistrate. His con-stables at Nanaimo and Comox are not CORA DE LAMOND only ordinary policemen, but Custom House officers. What may be said of Mr. Spaulding of Nanaimo may be said of Mr. Haynes in Kootenay district, with this addition that one of the constables of the latter is a postmaster. At the port of New Westminster the acting County Court Judge and Stipendiary Magistrate, Mr. Claudet, has nothing to do ministerially with the Customs; but in addition to his daties as judge, stipendiary, land and gold commissioner, and receiver of Internal revenue, he is still supposed to be a Government Assayer. Mr. Bush-by, at Yale, holds the same number of offices, Provincial and Federal, as Mr. Claudet, except that of Assayer. But he makes up for that by being nominally the Postmaster General of British Colthe Postmaster General of British Columbia. Mr. Sanders, at Lillooet, Mr.
Ball, at Cariboo, Mr. O'Rielly, at Ominecs, each and all are Federal so far as

Indeeship cost. County Court Judgeship goes,whilst their other duties are Provincial, and whilst some of their constables are postmasters. Mr. Pemberton, of Victoria, is also a dualistic official like those last enumerated, but is also Governor-inchief of the Victoria jail. Here, then, we have eight of the principal dual officials in the Colony,-and several questions naturally arise respecting them,which the local and Federal Legislature will in all probability have to decide. For instance : shall we make an arrangement with the Federal Government to keep up the dual system or not? As a matter of economy is it desirable? Or will the country insist on the appoint-ment of a new batch of County Court Judges who are lawyers by profession? Now, by some political legerdemain, all our County Court Judges, though dis charging the duties of a plurality of offi-cers besides, have been handed over to the Federal Government. The object evidently was to perpetuate on the bench a class of non-professional men as judges,
—or to secure for them a pension or some other office. We fear, however, that the temper of the country will as a whole be opposed to the continuance of non-professional men as judges,—and con-sequently our dual officials will either have to be pensioned or provided for by some other means by the Dominion Government. It was possibly the intention of the framers of the famous Civil List Act to keep them on; for not a single Gold Commissioner is put in the schedule to the Act; and hence no special provision has been made by the local Government for that class of officers. There is one thing, however, very certain, that all the judicial duties of a Gold Commissioner may be performed by a County Court Judge; and the mere ministerial duties, such as issuing licenses, recording mining or land elaims, etc., may all be done by clerk-constables, Hence with the exception of a Stipendiary Magistrate at Victoria, and possibly Cariboo, as Police Judges, there don't seem to be much necessity for paid Magistrates in any other part of the colony. Now if the country should declare, as we believe it will, against non-professional men sitting on the bench, the Federal Government will doubtless have to pension at least six out of the eight salaried Magistrates; and thus dual officialism will be at an end. So far as the administrative duties of Executive Councillor Hamley are concerned, it is presumable that he will, on the arrival of Gov. Trutch be relieved of that labor, by the appointment of a regular Ministry,—for it is said that our new

Indian Affairs.

Ministry has been slready named,—and the seal of official reticence has only to

be removed to acquaint the public with their distinguished names.

There is said to be great diseatisfaction existing among the Indians in the Thompson river country, owing to the way in which the Reserves have been surveyed. It sppears that Mr. O'Reilly has so contracted the Reserves that Indians don't like it. It is also said that the old chief at Nicolas river has been deprived of his

water for irrigation purposes. The Rev. Mr. Good has been exerting himself to adjust the difficulty with the Government; PLUMMER & PAGDEN but without success. We trust that the Federal Government will find it convenie to take Indian affairs under their manage ment at an early day.

Yesterday morning we gave a resume of the eport laid before the meeting of the Com- £75,255. pany, held on the 28th of June last. To-day

profits for the year ending May 31, 1870. The balance of undivided profits standing at the credit of the company on the 1st June, 1871, was £61,417 9s. 5d., as compared with £84,-069 11s. 2d. last year. The interim dividend paid in December, 1870, was £30,000, as against one of £20,000 in December, 1869. It will be observed that of the total receipts (£35,493-17s. 10d) from which the profit (£27,356 18s. 3d.) is stated to have been made in the past year, £11,424 14s. 2d. is due to the balance of gain on the premises in Fenchurch atreet; £5,585 12s. 9d. represents the income derived from various investments, and may, in fact, be set aside as simply balancing the charge for interest due on the deposits of the company's officers; and only £18,383 10s. 11d. arises from the profits of the fur trade. In the accounts presented fast year the pro-fits of the fur trade were stated at £19,002 9s. 2d ; but it must be explained that these accounts were made but on a different princip from these now presented. Last year, before showing the profits of the fur trade, the ac-countant deducted the amount chargeable as interest on the capital invested in the busi-ness. This year that deduction has not been made, as will at once be perceived on referring to the amount set down for "interest and dividends," which stood last year at £46,308 dividends," which stood last year at £46,308

As regards other business, the committee

need not remind the proprietors that they have a large landed interest in a territory boiler was inspected by a U. S. boiler inspec-tor on the 15th of June, and pronounced which is now beginning to attract immigrants and which bids fair to become populous within a comparatively abort time. The management and disposal of their estate ought soon to be made a source of profit; and it is important that steps should be taken, without much loss of time, for making provision in this respect. Again, it is of great importance that the company should it possible, avail itself of the great advantages which it at present possesses of becoming the principal agent for the supply of the new colony in numerous particulars. The knowledge which its officers have acquired of the wants of the country, the means of communication which it possesses, the credit which it enjoys, may all be turned to account for the the Government Inspector should be indicted creation of an extensive and profitable business, provided suitable machinery is employed and sufficient tact and energy are snown The committee have given much consideration to these questions, and have arrived at cylinder which was blown out, shows that the conclusion that it is desirable to employ the iron had been beaten out around the rivets the officers of the company, or some of them both in the management of the land and in the conduct of general business, on such terms as may give them an interest in its success. But they are also convinced that i would be unreasonable to expect that gentlemen who have been solely employed in the management of the fur trade, and who have, many of them, spent the greater part of their lives in remote districts and in commerce with Indians alone, should possess the experience or the qualifications necessary for the conduct of such business as will have to be carried on; and they are, therefore, of opinion that it will be necessary to dispense with the services of a portion of the present staff, and to make provision for supplying their places with the introduction of a cer-

pany, held on the 28th of June last. To-day we give the report in full, which will be said the sum of £31,800, being an amount found of interest:

The net profits for the year ending May 31, 1871, amount to £27,356 18s. 3d., as against an amount of £53,221 4s. 6d., which was stated in the report of last July as the net profits for the year ending May 31, 1870. The balance of undivided profits standing at the credit of the company on the lit June, 1871, was £61,417 9s. 5d., as compared with £64,066 11s. 2d. last year. The interim dividend and the propose to add the sum of £31,800, being an amount of £31,800, bei leaving the remainder standing to his credit in the Company's books and bearing interest at the fate of 4 per cent.; the second instalment should be drawn out the next year and the third in the year following; but officers would be allowed to leave the whole or any part in the hands of the Company if they desire to do so. Those who may be reappointed will of course have no claim to any further

retiring interest.

The committee strongly recommend the proprietors to sanction this arrangement. Its terms are undoubsedly liberal, but the committee are persuaded that the great object of ing the establishments and the busi ness of the Company on a thoroughly satis-factory footing cannot be attained at a lower cost; and that, unless such reorganization takes place, there is little prospect of the business being carried on at a profit. It now remains to consider the question of

the dividend for the present year. The accounts show that £30,000 was applied to the interim dividend of 6s. a share, declared in December last; and as the profits of the year ed within the year than has been earned in it It will, however, be remarked that the Com claims, and though this money has been car-ried to the capital account and is not proper-ly available for dividends, its receipt so far fur trade, instead of showing a profit, would have shown (after being debited with the in-terest on the capital employed in it) a loss of strengthens the ballance of assets as to justify the committee in recommending the division of a considerable portion of the undivided profits remaining over from former years. Those profits amount, as has already been various causes, of which the most prominent stated, to £61,417 9s. 5d.; and the committee is the loss of property during the disturbanare of opinion that a further dividend of 6s. ces at Red River, which has affected the ac- per share may be now paid out of them, thus counts to the amount of about £30,000.
